Mr. Sharp's Standpoint

His Friends Claim Election Has Been Fairly Decided—Could Not "Trade Off" Democratic Support

The Press article last week relative to the results of the race for the constabulary in the recent primary election was not very well received by some of the friends of Mr. Sharp. Some interpreted the article to be a reflection on Mr. Sharp's constituency, and that it inferred that unfair means were used to obtain the nomination for him. Such was not the intention of the article, nor is the Press assuming to take any side in the matter. When we make mistakes, or statements that do not seem to be fair or correct we are always glad to have the party who feels that he has been wronged to come in and talk the matter over. We do not keep a gun nor a dog; nor are we hot headed or quick tempered, but always ready for a logical, reasonable consideration of any question. We had little to say about Mr. Sharp's side of the case last week simply because Mr. Sharp himself has had little to say about the election results. He feels that he has won the election fairly and squarely, and that the people of Campbell, where both candidates live and are known, have shown their preference for him by a large majority. As for conceding to Mr. Sawyer the right to run as the democratic candidate, Mr. Sharp says that is not for him to say; he does not think it would be fair to his democratic friends who supported him at the election to turn around and swap them off in such a manner, and unless the Board of Supervisors take the matter up and take some action he is perfectly satisfied to leave the result as it is. If neither candidate got a majority vote on the democratic ticket, neither one is entitled to represent that party at the November election, since neither sought the nomination in regular form.

We publish again in a little different form the election returns with the votes thrown out added so as to show the count as it now stands, from which everyone can judge for himself just who is entitled to the nominations:

	Sharp	Sawyer	Whitney
Camp. Pre.			
Rep.	49	28	41
Dem.	8	6	3
Pro.	1		
Soc.	1	1	
Ham. Pre.			
Rep.	43	51	27
Dem.	3	5	
Pro.		1	
Soc.			
Total	105	92	71
Thrown out	2	6	
	107	98	

If a further allowance is made for the difference of six votes which Mr. Sawyer claims the Hamilton report to the Board of Supervisors shows in his favor, the count would stand Sharp 107, Sawyer 104, which still gives Mr. Sharp a majority of the votes.

An Attempt to Drive Out the Socialists

Some few days ago notices were posted about town stating that on Tuesday night, from the steps of the Coffee Club, an old soldier would give "ten reasons why the socialists should be driven out of town." At the appointed time a large crowd gathered to see and hear the man who had the audacity to attempt such a thing. Our Socialist friends were out en masse to defend their cause, and judging from the remarks and the interruptions as the speaker proceeded to have a little fun at the expense of local Socialist agitators, not even they knew the stranger or the real purport of his mission on the streets of Campbell. As expected by many, the speaker—who proved to be J. W. Wells of San Jose—soon got down to business and gave a very good Socialist talk.

Admission Day Excursion Rates

The S. P. Co. will sell excursion rate tickets to all points on account of Admission Day Celebration. The tickets being on sale from Sept. 8th to 11th, and good to return until midnight, Monday, the 12th. The rates will be 1 1/2 fare round trip.

Local and Personal

Fine stationery at the Press Office.

Mrs. Grace Fowler was in town Sunday. Claude Buttrick spent Sunday in Campbell.

This is Mrs. Palmer's last week at the Coffee Club.

C. L. Dick and family spent Tuesday in Santa Cruz.

Richard Goddard spent Sunday with friends at Niles Canyon.

Miss Hazel Brown has secured a school in Sonoma County.

Mr. Austin and family left Monday for a week's stay in Santa Cruz.

Miss Claudine Rubell leaves Saturday for a two weeks' visit in Monterey.

Mr. and Mrs. Easton Carter have moved into their home on Central Ave.

Mrs. Hagelin and daughter, Miss Anna, spent from Friday to Wednesday in the city.

Miss McBride left Thursday for Santa Barbara where she will teach the coming year.

WANTED—Orders for engraved cards, wedding invitations, etc. The Press Office.

Miss Mable Clendenin of San Francisco has been visiting Campbell friends and relatives.

George Jaderquist has gone to Berkeley, where he enters the University of California.

Mrs. Langley returned Monday after a ten-day stay with her sister-in-law in Boulder Creek.

Mr. William Donaldson left Friday for Gridley, Cal., where he will visit his son for several weeks.

Miss Dollie Blenkinsop spent the weekend with her sister, Mrs. Robson who is at Seabright.

Miss Myrtle Dunham entertained a few of her friends at her home on Central Ave. Monday evening.

BORN—to Mr. and Mrs. G. H. Hubbard, on Central avenue, Thursday morning, a 10 1/2 pound boy.

Miss Della Cook has gone to Colusa where she has a position as Science teacher in the high school.

Mrs. Emma Wilber and Mrs. Tuttle of San Jose spent Tuesday visiting with R. E. Dunphy on Los Gatos road.

Miss Ruth Hayes left today for Pleasanton to visit Miss Florence Brown, who attended High School here last year.

Miss Gaynelle Eddleman, who has been visiting relatives here for some time, returned Saturday to her home in Newman.

The family of W. L. Beacock moved to Palo Alto the first of the week, where they expect to reside while Carl attends Stanford.

Miss Agnes Boulware of College Park and the Misses Lorensen of Newman were the guests of Miss Besse Palmer Sunday.

Mr. and Mrs. Frank Lewis are here from Minnesota, and will make an extended visit with their uncle, the Rev. J. W. Lewis.

The Misses Alice and Marion Duncan, Dollie Blenkinsop and Dorothea Smith were camping near Congress Springs for a few days this week.

Mrs. I. Zion and Mrs. Donaldson visited the Watermans of Los Gatos Friday.

Mrs. Donaldson's niece, Miss Minette Waterman, was at home for the afternoon.

The W. C. T. U. met at Mrs. Bull's last Wednesday afternoon. After the business meeting, a little social time was enjoyed, as it was Mrs. Poore's eighty-first birthday.

E. E. Sower invites the public to call and see his new line of Ladies', Gents' and Children's shoes. All Eastern goods of the latest styles, and prices as low as San Jose.

The Peninsular Railway has increased the Coast Artillery Band, N. G. C., to twenty-five pieces for their concert at Congress Springs, to be given on Sunday afternoons only.

Mr. and Mrs. William Shelley have gone to Seabright for an outing. This is the first time in twelve years that Mr. Shelley has been on a train, and it is hoped that the trip will do him good.

Miss Charlotte Davis has returned to Campbell for a two weeks' vacation. The school where she has been teaching, the Burrell School at Wright's, has closed for the two weeks on account of the prune picking.

Miss Matilda Hayes left Campbell Wednesday, and spent Thursday and Friday with a Normal friend in Berkeley.

From there she goes on to Winters, where she has a position as Commercial teacher in the High School.

There will be special excursion rates to San Francisco, on account of Admission Day Celebration, tickets on sale Sept. 7th to the 11th, and good to return until Wednesday, the 14th. The fare will be one and one-third round trip.

Two Happy Surprises

Misses Matilda Hayes and Zena Kennedy Honored by their Many Friends

The Epworth Leaguers and their friends gave Miss Matilda Hayes and Miss Zena Kennedy a very pleasant surprise party last Friday evening at the home of Miss Hayes. The affair took the nature of a farewell to the young ladies, who leave soon for their schools.

The evening was spent very pleasantly in amusing contests and music, the chief feature of the latter being the darky songs by Rev. Smart, who accompanied himself on the guitar.

Those who were present and enjoyed the happy affair were: The Misses Gertrude Cook, Floy Lloyd, Zena, Florence and Ernestine Kennedy, Beth Bucknall, Abbie Gilbert, Mary Lewis, Mary Clark, Margaret Fabinger, Bessie Palmer, Jessica McBride, Esther Smith, Helen Marshman, May and Phebe Farley, Muriel Palmer, Matilda and Ruth Hayes, Miss Rogers, Messrs. Oscar F. Olson, Will Marshman, E. R. Kennedy, Warren Macy, Jesse Hayes, Prof. and Mrs. Smart of Soccho, China, Rev. and Mrs. John F. Wilson, Mr. and Mrs. R. Allison and little daughter Lucile, Mrs. Hayes, and Mr. and Mrs. L. C. Dick.

Mr. and Mrs. Chas. W. Young Recipients of Many Beautiful Gifts

The young couple whose marriage we mentioned last week, Mr. and Mrs. C. W. Young, returned Monday from Santa Cruz, and were the guests of the groom's sister, Mrs. E. S. Brown. Monday evening they went over to the home of Mrs. Daniel Fore, aunt of the groom, thinking to spend the evening quietly, and were surprised by all the relatives, and a delicious luncheon. The dining room was beautifully decorated with cut flowers and ferns. The evening was passed in music and conversation, and in admiring the pretty gifts with which the relatives came well supplied.

Additional Locals

Both the High School and the Grammar School will open Tuesday, Sept. 6.

For lack of space in this paper, Mr. Preston's article on Andersonville Prison Experiences will need to be held over till next week.

It is said that Campbell is to have a new plumber and hardware dealer. H. T. Chase who lives in the Cambrian district has rented the Sutter building and will attempt to establish business here. We would not consider Campbell a very promising field for one in the hardware or plumbing line as our present dealer meets the needs of the community in such a thoroughly satisfactory manner.

The Misses Blanche and Bessie McNeely, of Saline county, Missouri, granddaughters of J. P. Huston, an old Missouri friend of Grandpa Brown, made the latter a very pleasant call last Wednesday morning. They were accompanied by Misses Nanie and Bessie Blaney, of Fresno, who are granddaughters of Rev. Warren Compton, also a Saline Missouri friend of Grandpa Brown. The party was traveling in an auto.

Miss Besse Palmer is assisting with the work at the Press office, which accounts for the increased amount of local news in this issue. It is the hope of the editor to build up sufficient business in the stationery department as to enable us to give steady employment to some young lady of Campbell. It will also give to the town lines of goods not otherwise carried; and, furthermore, will result in a much more interesting newspaper. New subscribers are coming in right along three during the past week. The increased amount of job printing we received is a source of much encouragement. At one time during the past week an experienced pressman was employed, which made a total of four in the office.

Foley Kidney Pills

Tonic in quality and action, quick in results. For backache, headache, dizziness, nervousness urinary irregularities and rheumatism. For sale by Mrs. F. W. Brundage.

Trouble! Trouble! Trouble!

Trouble all day and every day with two pairs of glasses. Wear KRYPTOKS. One pair of glasses will then do the work of two. No trouble at all. Just put them on and see, see everything near and far, your friend across the room or across the street as well as the book or paper in your hand. Don't be talked into buying a substitute. Get the genuine. Ask for Kryptok.

COAST HAPS AND MISHAPS OF THE WEEK

Recent Occurrences Along the
Pacific Slope Related
in Brief Items.

Paragraphs Selected With a View
to Giving Busy Readers the
News in a Nutshell.

Berkeley.—The Young Men's Christian Association has opened a bureau of information at Stiles' Hall for the benefit of new students at the University of California.

Alameda.—Rev. Joel Van Anda, a retired minister of the Methodist Episcopal Church is dead, after a lingering illness. He served in past years as pastor at San Jose, Red Bluff, Vallejo, Petaluma and other California points, and also in the East. He is survived by a wife and three daughters.

San Francisco.—The police department has instituted a new method of identification known as the "Anatomical Index." A card index is used, which records all the anatomical characteristics and deformities of crooks. The system will be used in conjunction with the finger-print system and the Bertillon system of measurements.

San Francisco.—Peter Palassou, the aged milkman who killed his wife with a pitchfork in the barn of his ranch on the San Bruno road August 10, 1908, will have to serve out his eight-year sentence in San Quentin penitentiary. The Court of Appeals has affirmed the sentence imposed by Judge Cabaniss in June of last year. Palassou is 63 years old.

Vancouver, B. C.—A contract for the extension of the Kettle Valley Railway line from Rock creek to Bull creek, on the west fork of Kettle river, a distance of 35 miles, has been awarded and construction work will be started within three weeks. The building of a 25-mile section of the same route from Morritt south through Nicola valley is in progress.

Martinez.—A fire started as part of the ritual indulged in by Ah Sing, a Chinese in the local cemetery, got beyond his control, and burned the wooden memorials in the Potter's Field, as well as other inflammables near the graves, consumed much of the fencing surrounding the cemetery, and was only extinguished after Ah Sing had been severely burned by the flames.

Washington.—Prince Tsai Shun, one of the Commissioners of the Royal Navy of China, is due to arrive in San Francisco September 16. The Prince heads the committee, which will spend several weeks making a study of the United States navy. The party expects to sail from San Francisco October 4 for home. The visit follows close upon that of Prince Tsai Tao, who headed the Chinese Army reorganization board, which recently studied the United States army.

Seattle.—Unless the late run of salmon in western and central Alaska exceeds previous late runs and the expectations of packers in Seattle, Alaska canning operations this season will fall short of the usual output. Advices received during the past few days from Seward, following the arrival of the steamship Dora G. Westward, stated that the pack in nearly all districts except Cook's inlet has so far been far below last year's output, and nowhere near this season's expectations.

Nome, Alaska.—All the indictments returned last year against Jafet Lindberg, the Alaska and California mining millionaire, in connection with an alleged false affidavit made by one of his miners certifying that assessment work had been done upon a Pioneer Mining Company claim, have been dismissed. The affidavits upon which a charge of perjury was based were discovered to have been lost by Assistant Attorney Hill and the charge was dismissed on this technicality, the merits of the case not being considered.

San Francisco.—United States District Judge Van Fleet fined the California Pine Box and Lumber Company \$1000 for accepting a rebate from the Southern Pacific Company. This is one of the cases in which the railroad company pleaded guilty of granting rebates on freights, and for which it paid a fine of \$18,500. There are 19 such cases, and the box company was one of the defendants. The box company accepted from the railroad company a rebate of \$5.43 on a shipment of box shooks from Verdi, Nev., to San Jose, in June, 1906.

ORLAND PARK IRRIGATION PROJECT NOW COMPLETED

Work of Extension Depends Upon Report of U. S. Army Engineers.

Orland.—The East Park dam of the Orland Government irrigation project is completed and all the forms and scaffolding have been removed, leaving the huge concrete mass ready to receive the flood waters of winter.

Secretary Ballinger was to visit the Orland project this month, but his visit has been postponed indefinitely. A number of officials of the United States Army Board will visit the project in the near future, no date having been fixed as yet, and their report will have considerable weight as to future extensions on this project.

An appropriation of \$20,000,000 was made by the last Congress to be expended on the various projects under construction by the United States Government, and probably some of this money may be devoted to extensions on the Orland project. There is some talk already of extending the territory to be irrigated, and if the money is forthcoming this will be done at some future date. Water will be available next summer for the territory already under the project.

LUTHER BURBANK EVOLVES TWO NEW PEACH SPECIMENS

Plant Wizard Produces Valuable Crosse of the Crawford and Muir.

Berkeley.—Luther Burbank has added two horticultural masterpieces to his innumerable creations, according to Professor E. J. Wickson, dean of the University College of Agriculture and close friend and champion of the Santa Rosa man. He predicts that the new Burbank peaches, which combine the best qualities of the famous Crawfords and Muirs, will be of the greatest economic value.

Specimens of the peaches have been sent to Professor Wickson for examination and he praises them highly. One variety carries into the Crawford the harder and sounder pit of the Muir, while retaining the high color, juiciness and deliciousness of the former. The other specimen retains the color and free pit of the Muir with an improvement on its flesh and flavor.

Professor Wickson has written to Burbank, praising him for his new fruits.

Deposit Certificates in Postal Banks.

Washington.—Postmaster-General Hitchcock has received a report that the Committee on Organization of the Postal Savings Bank systems is in favor of the use of certificates of deposit instead of passbooks as previously decided upon by the committee in framing its tentative plan. The proposed system would render unnecessary a great part of the bookkeeping that would be involved in the passbook system, it is said.

Ice Cream Carries Infectious Germs.

Philadelphia.—The startling assertion is made by Dr. Warren Rosenthal that many children have been infected with germs of tuberculosis by eating cheap ice cream. Dr. Rosenthal reported a dozen cases of dangerous infection that have all been traced to the confection which is sold by pushcart vendors and made in cellars, stables and dirty living rooms in congested dwellings.

Struck It Rich in Oil.

Redding.—A. C. Halter, a mining man, who came here two years ago from Wisconsin has just struck it rich. While in Wisconsin he paid \$500 for a piece of land near Coalinga. He had not seen it, but took the advice of a friend. He has just returned from a trip to Coalinga and says he refused \$25,000 for the land.

Jap White Slave Dealer Deported.

Leavenworth, Kas.—Released from the Federal prison here, Kuratore Suzuki, a Japanese, was arrested at the gate by Thomas Topping, an immigration officer from Butte, Mont., who will take him back to San Francisco for deportation. Suzuki was convicted of importing Japanese women for immoral purposes.

Raise Bananas in New York City.

New York.—After 20 years' efforts the horticultural experts of the Central Park Conservatory have just harvested their first bunch of bananas. The fruit is finely formed and the bananas are of full size. The bunch has been delivered to Bellevue Hospital for distribution among the tuberculosis patients.

Honolulu Will Help S. F.

Honolulu.—The Honolulu Chamber of Commerce has adopted a resolution pledging its support to San Francisco as the site of the Panama-Pacific Exposition in 1915.

Grafting Commission Merchant Goes to Jail for a Year

San Francisco.—John F. Wilson, alias Warren & Co., alias John W. Warner, and known as the "Pirate Commission Merchant," who is supposed to have realized \$500,000 by swindling farmers during the last three years, was sentenced by United States District Judge Van Fleet to imprisonment in the Alameda County Jail for one year and to pay a fine of \$500. Wilson was convicted of having used the mails to further a scheme to defraud.

His plan of operation was to mail circulars to farmers in California and Nevada offering to sell hay, grain and other products on commission and enclosing a schedule of prices much higher than the market rate. When he received the goods he sold them for whatever he could get and pocketed the proceeds. He always asked for carload lots and received them.

He was exposed by W. C. Pitt, of Lovelock, Nev., who shipped to him one carload of hay and two of bran. Pitt became suspicious and laid the matter before Postoffice Inspector Johnson, who made an investigation and procured proofs against Wilson. Wilson was indicted and pleaded not guilty. Recently he withdrew that plea and pleaded guilty.

Johnson found that in one week alone Wilson sold \$100,000 worth of goods, and that he had sent from \$50 to \$100 per week to his wife in Los Angeles.

Papers found among Wilson's effects showed that in the winter of 1907-1908 he operated in Los Angeles. During a portion of 1908 he kept an office in Bakersfield, operating from Bakersfield and Los Angeles under the name of

John W. Ward & Co. In May, 1909, he did business in Hamilton, Ontario, under the firm name of John W. Hamilton & Co. In September, before returning to California, he operated in Detroit, Mich., under the name of the F. H. Webb Company.

Attorney James G. Maguire made plea for mercy for the defendant. He said that Wilson had a wife and five children, the oldest of which was 16 years of age; that Wilson was a kind and indulgent husband and father, and that his family was dependent upon him. He represented, also, that Wilson had been confined in jail for nine months, and that this fact should be taken into consideration in imposing the sentence.

"You are an intelligent man," said Judge Van Fleet, "and you knew you were violating the law; did you not?" "I didn't think I was violating any Federal law," replied Wilson. After a perceptible pause he added, "or State law."

"But you knew that it was a very dishonest business; that you were defrauding persons with whom you had dealings. What did you do with the money?"

"Well, I supported my family with it."

"You appear to be a man of intelligence," continued Judge Van Fleet, "and it is evident that you didn't commit this crime through ignorance. However, out of sympathy for your family, and for no other reason, I will not send you to the penitentiary."

The maximum penalty for the offense is 18 months' imprisonment in the penitentiary.

Dog's Paw and Human Tooth Sold as Articles of Diet

New Orleans.—Closely following the discovery of a dog's paw in a can of preserved tongue opened by Philip Vresinski, a merchant of Jackson, La., formal complaint was made to the United States Food Inspection Bureau by Francis Doyle of this city that he found a human tooth in a can of corned beef bearing the label of the same Chicago packing house mentioned in Vresinski's letter to Professor E. L. McGee, chemist in charge of the Government laboratory.

Doyle's discovery was made exhibit A—the tooth itself. It is evidently from a man who was equipped with molars of unusual size. The edges

are rounded as though the tooth had slid through a meat-grinding machine. Vresinski's letter was forwarded to the chief inspector of the Pure Food Bureau in Washington.

Professor McGee has demanded that the Jackson merchant return to New Orleans the case of canned goods under suspicion, in order that a chemical analysis may be made.

Until its contents are tested nothing official will be given out. Professor McGee said the name of the Chicago packing house was mentioned in Vresinski's letter, but declined to tell it until it has been legally established that the concern is criminally negligent.

State Fruit Growers' Convention in Stockton

Stockton.—Commissioner of Horticulture J. W. Jeffrey has officially called a State convention of fruit growers to be held in Stockton some time in December. Jeffrey so informed George Ashley, the prominent vineyardist, and instructed him to apprise J. M. Eddy, secretary of the Chamber of Commerce.

"I am sure the selection of San Joaquin county is a wise one," writes the Commissioner.

There will be no less than 200 fruitmen and shippers from all parts of the State. Standardization of pack, shipping rates, fruit growing and other matters of importance will be considered. The convention promises to be the most important ever held in California.

The Chamber of Commerce and other prominent bodies will provide an excellent entertainment for the city's guests.

Blushing Bride Was Dressed in Nightgown and Stockings

Atlanta, Ga.—Arrayed only in her nightgown and stockings, Miss Columbia Cheek, a prominent member of Atlanta's younger society, was married at 3 o'clock in the morning to Guy H. Buchanan, Buchanan and Miss Cheek had been engaged for some time, but the girl's parents bitterly opposed the match, locking her in her room at night after taking away her clothing. Buchanan after midnight went in an

automobile to the Cheek home. By throwing pebbles against the window he attracted the girl's attention and found her willing to elope. By means of a stepladder Miss Cheek descended into the arms of her lover, was placed in the auto and hurried to the rectory of Emmanuel Baptist church, where the Rev. W. L. Gilmore was aroused and quickly made the lovers man and wife.

Love Romance in Life of Angel of the Crimea

Fox Lake, Wis.—The death of Florence Nightingale, the "Angel of the Crimea," recalled a romance in which Fox Lake is directly interested.

Florence Nightingale and William Shore were cousins in England and were lovers. The English law forbids marriage of cousins, so they pledged their faith and separated, neither ever to marry.

William Shore drifted to Fox Lake, Wis., where he lived many years, dying in 1868, and his remains are buried in Waushara cemetery in this village.

Florence Nightingale awaited in her beautiful home in London the supreme call to join her lover in death, which she has just answered. Each was faithful, as neither ever married.

RAPID MARKET FOR POULTRY

Quicker Bird Can Be Brought to Marketable Size, Greater Profit and Fewer Losses.

I always push my young stock along as rapidly as possible until marketed, or until brought to maturity, says a writer in the Baltimore American. This it pays to do, even when I must buy feed and at a high price. The quicker a bird can be brought to marketable size or to the productive stage, the greater the profit, to say nothing of quicker returns and shortened risk. Rapid growth is always cheapest and quick returns most satisfactory. There are always fewer losses in a flock kept growing vigorously than in one allowed to drag, and a shorter period in which chicks are a possible prey to hawks, rats and other enemies.

My young stock is never stinted. After it is removed from the brooder I continue to feed regularly and as generously as before. Feed for a considerable time consists largely of coarsely ground grains or fresh, sweet milk. For this I like corn and wheat principally at first. Later I add other grains, often omitting the wheat or feeding it whole by itself. Rye, although chicks will not eat it whole, is excellent cracked with other grains. Barley, also peas in small quantities, is good. As chicks become larger whole grains are gradually substituted for cracked. Rye, if fed whole, is cooked. In this shape chicks are greedy for it, and it furnishes excellent food. All summer I like to feed a little soft food now and then, either ground feed, shorts or bran, wet with milk or warm water. Grit I keep constantly before my flock, also pure water.

GREAT VALUE OF DAIRY SIRE

Important That Calf Should Have Good Parentage on Both Sides—Pure Breed Are Costly.

(By R. B. Roe.)

Raising the heifer calves of good, high-producing cows, is a great fundamental requisite for the best and easiest improvement of a dairy herd.

But those calves will take their qualities from both parents, and it is equally important that each calf should have good parentage on the male side. But an inspection of many dairy herds will show that comparatively little attention is paid to the quality of the sire.

I have too often seen herds in which the heifer calves were raised for future cows, but in which the bulls used were miserable little scrubs, and weaklings, obtained by simply saving a grade calf from the herd.

And of many other sires, fairly good as individuals, nothing is known of the actual milk production of their female ancestors.

There are as I view it two principle reasons for this. One is that under the custom of selling the calves for veal it does not make much difference about their breeding. But as this custom must be changed by successful dairymen and the best heifer calves raised for cows, it becomes necessary to provide good sires.

But another great reason is that the pure-bred sire costs more money. Underlying both these is the fundamental reason that many dairymen do not yet realize the wonderful improvement that can be wrought by a good head of the herd.

Good Fly Remedy.

The following is recommended as a good home-made fly remedy: Resin, 1½ pounds; laundry soap, two cakes; fish oil, half pint; enough water to make three gallons. Dissolve the resin in a solution of soap and water by heating, add the fish oil and the rest of the water. Apply with a brush. If to be used as a spray, add a half-pint of kerosene. This mixture will cost seven to eight cents per gallon and may be used on cows or calves. One-half pint of this mixture is considered enough for one application for a cow; a calf, of course, would require considerably less. Two or three applications a week will be sufficient until the outer ends of the hair become coated with resin. After that, retouch those parts where resin has rubbed off.

Making a Garden.

Keep the hoe going in dry weather and you will not need the watering pot often.

The wheel hoe will save many a backache and do the work of three hand hoes.

Plant the rows all one way—north and south—so the sun can strike both sides.

Do not plant short rows, but let them run the whole length of the garden if need be—why not?

Wild strawberries have the most delicious flavor. They are easily transplanted to the garden.

Spray Your Trees.

Spray your trees, fruit or no fruit. It will take grit, grace and greenbacks to spray a fruit tree without the fruit in sight. It's the next crop or crops that should interest you now. Be hopeful, be faithful, be timely, if you wish to be a successful orchardist.

The apple crop will be a short one in 1910 and not so evenly distributed as in 1909. Look for optimistic reports from the fellows who have axes to grind.

Rape for Lambs.

A good growth of rape is fine for the lambs, but some say when it is sowed in the corn it does more injury to the corn crop than it has value. How about it?

WORLD'S NEWS OF THE WEEK SUMMARIZED

Adventures of the Children of
Mother Earth Related in
Condensed Form.

Comprehensive Review of Passing
Events in Every Quarter of
the Terrestrial Globe.

New York.—David Rankin Jr., who a month ago devoted his entire fortune of \$3,000,000 to endowing a trade school in St. Louis, Mo., that bears his name, died at Atlantic City of heart failure.

Livingstone, Rhodesia.—The sculling match for the championship of the world between Richard Arnst of New Zealand and Ernest Barry of London was won by Arnst, the champion, by two lengths.

Boston.—Fire in the five-story warehouse of Crimmins & Pierce, wool merchants, on Congress street, caused a loss of over \$400,000. The value of the wool destroyed is estimated at from \$350,000 to \$375,000.

Iowa City, Ia.—Ada Paintin, 15 years old, threw a league baseball 187 feet in a baseball game here, in striving to break the record, alleged to be a world mark set by Myrtle Carroll of Oak Park, Ill., in July, when 180 feet were covered.

Washington.—Paper money will hereafter be counted once less than at present as it comes off the press at the Bureau of Printing and Engraving, and the Treasury department will save \$30,000 a year for the Government. Thirty women clerks, each drawing a salary of \$1000 a year, will be dropped.

New York.—President Thomas B. Lynch of the National League has indefinitely suspended Manager John J. McGraw of the New Yorks for protesting too vehemently against the decisions of umpires Charles Rigler and Robert Emslie in the recent Pittsburgh-New York series on the Polo grounds.

El Paso, Tex.—Hordes of mosquitoes are interfering seriously with the work of constructing a telegraph line across the desert in the vicinity of Wilcox, Ariz. The summer rains formed a vast shallow lake in that vicinity, wherein the mosquitoes have bred. The gangs of men are beset day and night and the work is practically at a standstill.

Portsmouth, England.—The cruiser Rainbow, one of the ships purchased by the Dominion of Canada from Great Britain to form the nucleus of a Canadian navy, has sailed from Portsmouth for Esquimaux. The Rainbow, which is a second-class cruiser of 3600 tons displacement, carrying two six-inch guns and six of 4.7 inches, carries a full staff of instructors lent by the British navy.

New York.—A Columbia University statistician has been comparing the census figures thus far announced at Washington with those of the previous enumeration. He figures that the average gain thus far is 29.7 per cent. If a similar percentage applied to the rest of the country, the net gain for the whole country will be about 17,300,000, making the total population of the continental United States over 93,600,000.

Canton, O.—By a court decision Mrs. M. G. Barber, sister of the late widow of President McKinley, was given a title to one-half of the property known as the McKinley block in Canton, valued at \$45,000. James McKinley, a nephew of President McKinley, and other heirs-at-law of the late Executive, brought suit to get possession of the property, but the court held that the title of Mrs. Barber is valid and that the property belongs to her.

Washington.—Cabling from Tokio the United States Ambassador to Japan reports to the State department that the serious floods in Japan have been worse in Tokio and in the suburbs, and that the city is supporting 500,000 refugees. Official reports showed 1122 killed or missing, 3953 houses destroyed and 51,655 houses damaged. Communications are reported to be considerably interrupted and the damage to the rice crop is estimated at about \$4,250,000. No Americans are reported lost.

Washington.—Reports from the West and the Middle West now seem to indicate that the probabilities of a heavy drain on the eastern banks to pay for the crop movement are reasonably remote. From the viewpoint of the treasury conditions that have arisen since the possibilities of a stringency were recognized early in the year have contributed to the present situation. The liquidation in the stock market and checking of farm loans by the banks of the Middle West have been largely responsible.

Where is Your Hair?

In your comb? Why so? Is not the head a much better place for it? Better keep what is left where it belongs! Ayer's Hair Vigor, new improved formula, quickly stops falling hair. There is not a particle of doubt about it. We speak very positively about this, for we know.

Does not change the color of the hair.

Indeed, the one great leading feature of our new Hair Vigor may well be said to be this—it stops falling hair. Then it goes one step further—it aids nature in restoring the hair and scalp to a healthy condition. Ask for "the new kind."

PROBLEM WAS EASILY SOLVED

Amusing Story of American Girl Being Presented at European Royal Court.

An amusing story is being told in social circles in London about a young American woman who was anxious to be presented at a certain European court. Of course, the high officials had to make inquiries about her social status in her own country, and pronounced their veto, says the New York Herald. It could not be done. The daughter of a man who sold boots and shoes could not be received by his majesty at a royal court. The girl was in great distress, and promptly cabled home to her father. Next day she received the following reply:
"Nonsense. It's not selling. Am simply giving them away. See advertisement."

The cablegram she duly presented in the proper quarter, and, although the ending did not seem quite clear to the official mind, it was held to solve the difficulty. So she was presented at court as the daughter of an American gentleman who was noted as a great philanthropist.

Sacramento.—A dirigible balloon ascension, fancy rifle shooting and last but not least, a bucking buffalo, are the latest additions to the already crowded program for the Fiesta of the Dawn of Gold. The contract for the exhibition with a dirigible, the largest in the United States, was signed today with Prof. L. L. Hill. He agrees to stay in the air at least three quarters of an hour and to return to the starting point. He will also try for the world's altitude record and if he succeeds he will receive a special prize.

Adolph Topperwein and wife will give exhibitions of fancy shooting with rifles, shot-guns and revolvers. Topperwein is a champion in his class and his ability to hit small objects thrown in the air is marvelous. He is probably the greatest rifle shot in the country today. Mrs. Topperwein is the champion lady rifle shot of the world and the peer of most champions of the sterner sex.

The bucking buffalo is a recent addition to the Frontier Days show. In addition to the making it interesting for any venturesome cowboy who says to ride him he will be seen in harness with a mate and in races with cow ponies.

Gladstone's Memory.
Gladstone's power of memory, Sir Edward Hamilton testifies, the London Chronicle says, was always one of his great assets. In his last years he often lamented that it was not what it had been, but even so it came triumphantly out of some remarkable tests.

In his 83d year he set himself to recall Manzoni's ode on the death of Napoleon, which as a young man he had translated into English. He had entirely forgotten his own version, but by dint of hard "digging" or "fishing up," as he called it, he wrote down 104 of the 108 Italian lines. Two years later he essayed to write from memory a complete list of all the men who had been his cabinet colleagues and enumerated 68 of the 70.

The veteran's testing how his memory survived, recalls Lord Palmerston a few weeks before his death climbing to the top of some high railings to ascertain how much bodily energy he had left.

Couldn't Stand Satire.
A burglar while attempting to rob a bloated bondholder of Maryville by mistake got into the humble residence of an editor next door. After unsuccessfully fumbling about for suitable assets for some time he was disgusted to observe the tenant of the house sitting up in bed and laughing at him. "Aren't you old Skinderen, the capitalist?" inquired the housebreaker. "Nary time," chuckled the journalist. "I'm the editor of the Screaming Eagle."

"Jerusalem!" said the burglar, looking at his stemwinder. "And here I've been wasting four precious hours on this branch alms-house. I say, old quill driver, you never poke fun at your subscribers, do you?"

"Not the cash ones."

"Exactly," said the burglar, taking out his wallet. "Here's six months subscription to call this thing square. If there's one thing on earth I can't stand, it's satire."—London Tit-Bits.

Over the Telephone.
"Hello! Is this the information editor?"

"Yes."

"Who is the president of Nicaragua?"

"Wait a minute, and I'll—"

"But I want to know who's president now—not who's going to be president a minute from now!"—Chicago Tribune

A Definition.

Missing Ships.
Men go down to the sea under billowing canvas in fewer and fewer numbers, the "tin kettle" tramp now doing the old clipper's work, but Neptune still exacts his toll from the square-rigged ships that are fated to float out upon the oceans, bound 10,000 miles or more, and never again be heard of. Ten big sailers thus vanished in 1908.

Last year eight wind-jammers of large burden were recorded on the world's list of missing ships. One was an American, the four-masted Fort George of 1,770 net tons, and there are few enough of ours left. Most of them are swallowed on Cape Horn voyages.—New York Press.

Its great merit alone has enabled the Bitters to continue before the public for over 57 years. You really ought to try a bottle for **Poor Appetite, Indigestion, Headache, Cramps, Diarrhoea, Malaria.**

AUTO GOSSIP

San Francisco.—Mr. F. J. Linz, vice-president and general manager of The Maxwell-Briscoe Pacific Co. of San Francisco, distributor for Maxwell automobiles, has returned to his official duties from a two months' trip East. While away and visiting the mammoth Maxwell factories, he purchased 300 Maxwell automobiles for fall trade. The original allotment for the Pacific Coast was 1000, which were all delivered before June 1st.

In speaking of the automobile industry, Mr. Linz says that not a manufacturer of standard make will be able to supply more than half the demand. "We purchased 2500 Maxwells for 1911 trade on the Pacific Coast and we could easily dispose of 5000. Every up to date business man, farmer or rancher is buying an automobile of some description and the time is here when he cannot afford to be without one. As a money and time saver, the automobile has no equal."

San Francisco.—With the demand for motor cars mounting upward with astonishing rapidity, innumerable new factories entering the field, and more and more capital being turned each year into the industry, it becomes somewhat difficult to set an estimate on what the next few years will develop for the automobile business. Speaking of the future of the industry, H. O. Harrison, president of the H. O. Harrison Company, local distributors for the Peerless and Everett cars, said:

"In regard to the future, we must admit that the day when the automobile manufacturer who has been assembling and extensively advertising his car can offer a spurious article is past. He must deliver the goods or the public will soon find him out. There is not a manufacturer who can dictate to the public. If he would be successful, he must make what the public demands. The industry is to be conducted in the future on a healthy basis. The complete confidence of the general public is to be secured, and the bankers of the country are the ones who will back up the car."

"I expect the average output of the automobile industry will be approximately 200,000 cars a year, at a valuation of \$225,000,000. Under these conditions, which will be the normal manufacturing conditions of the future, it is conservatively estimated that there are alone 3,000,000 agriculturists and suburbanites to buy automobiles in the future. It is certain to take from twelve to fifteen years to supply these 3,000,000 prospective buyers."

The Frank O. Renstrom Company of San Francisco are in receipt of a communication from the Kline-Kar factory at York, Pa., stating that the Kline-Kar won the hill-climbing contest held at McKeesport, Pa., and was awarded a handsome trophy. The Kline-Kar also won first place in its touring car class.

E. le Roy Pelletier, who, as an advertising and publicity man, has become one of the best-known figures in the automobile world, recently sailed for Europe with his wife and some friends. With him Pelletier took a six-cylinder Lozier touring car, which will be used extensively in touring the Old World. This purchase was made although Pelletier's business connections were with another firm. Because of his wide experience in automobile affairs and thorough acquaintance with the auto trade generally, Calvin Elb, vice-president of the Pioneer Automobile Company, declares Pelletier's choice the highest recommendation for the Lozier.

San Francisco.—F. W. Simpson, a prominent rancher of Wellington, Nevada, came to town recently and took delivery of a Buick 30, which he drove home. This machine is to be used ever difficult sand grades by Mr. Simpson in supervising his ranches, of which he has three extending altogether for a distance of sixty miles. Formerly it took from one and a half to two days to cover this distance with horses and wagon, but a demonstration has satisfied Mr. Simpson that the Buick can make the trip in three hours.

San Francisco.—Neal J. McKeon and Hugo Muller, both of the Hugo Muller Auto Co., left last week for an extensive visit to the Moline and Premier factories in the East. The auto situation generally will be studied by both men and arrangements made for 1911 season's allotments. In the absence of Muller and McKeon, Chas. A. Davis, representative of the Premier factory, will take charge of the Muller business here.

Within but little over a month three automobiles have succeeded in lowering previous records for the San Francisco to Del Norte and return trip while using Monogram oil. The last of these was the Simplex, which Harry Michener took over the route in 7 hours and 38 minutes. He declares that the lubrications throughout the trip was perfect.

DRINK DOLE'S Pure Hawaiian Pineapple Juice

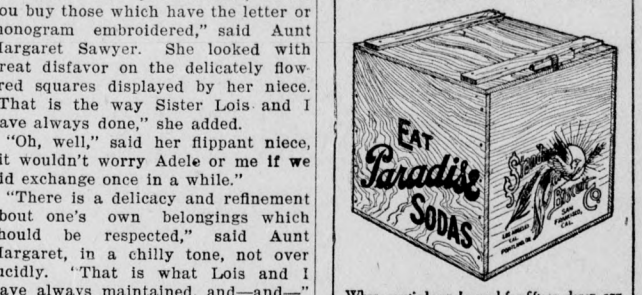

Drink it Pure The Drink Delightful!

All the bouquet of the ripe pineapple field, all the snappy acid tang, with none of the rude "bite" you are accustomed to in the unripe fruit-store product you have known; all that's good and nothing that's in the least unwholesome; all that's delicious; all that's satisfying—all this is yours in Dole's Pure Hawaiian Pineapple Juice. Non-alcoholic, of course. The Dole process of refining the juice of the Hawaiian Pineapple adds no water, no sugar, absolutely nothing to the pure juice. Serve it cold—the colder the better; cracked ice in the glass is a help. An olive, a saltine, a cheese straw, a Welsh-rabbit emphasizes the flavor. It adds interest to any afternoon or evening entertainment, at home or at the club.

Every bottle of Dole's Pure Hawaiian Pineapple Juice has the signature of *James Dole* in red ink across the label. At Druggists and Grocers

Writing to Compromise.
Woman of the House—No, I haven't any old garments to give you. Needham Quick—I ain't so dead sot on havin' 'em old, ma'am. If you've got any that's only slightly soiled they'll do jist as well.—Chicago Tribune.

TO VISIT SAN FRANCISCO
Without seeing A. Andrews' Diamond Palace would be like visiting Europe without seeing Paris. It is the most magnificent jewelry store in the world. Visitors welcome. 30 Kearny St. Open 8 A. M. to 5:30 P. M. Established 1850.

Ready-made cyclone cellars of corrugated galvanized iron have been placed on the market by a Western metal company.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Arithmetic by Hand.

We shall never be in danger of forgetting that our ancestors did their sums on their fingers so long as arithmetic retains the word "digits." But modern civilization knows nothing of the elaborate developments of this method. It takes a Wallachian peasant to multiply 8 by 9 on his hands. This is how he does it: The fingers of either hand, beginning with the thumb, stand for the numbers from 6 to 10. So the ring finger of one hand and the middle finger of the other are stuck out to represent 8 and 9. Counting the fingers remaining on the side farthest from the thumbs he finds them 1 and 2 respectively, and 1 multiplied by 2 gives him the units of his product—2. Then he counts from the thumbs to the stuck out fingers inclusive, finds them 3 and 4, adds these, and gets 7 for his tens. Answer, 72. All this to avoid knowing the multiplication table beyond 4 times 4!

With the Eye of Faith.
"Dr. Fourtly, don't you believe the time is coming when the swords shall be beaten into plowshares and the spears into pruning hooks, and men shall learn war no more?"
"Indeed I do, Brother Millsap."

"About the time when that other prophecy is fulfilled—and then shall the end come."—Chicago Tribune.

The Professor Explains.
"Why is it?" inquired the doctor, "that astronomers, whose work must be peculiarly trying on their powers of vision, almost uniformly have strong eyes?"

"My friend," answered the professor, "it is because they have strong eyes that they are astronomers."

READERS of this paper desiring to buy anything advertised in its columns should insist upon having what they ask for, refusing all substitutes or imitations.

UNCLE SAM'S JOB

Our Monroe doctrine makes us in a sense the guardian of the American republics, saying to all the monarchies of the old world, "Hands off. We cannot consent to the extension of your forms of government to this continent."

Having taken that position, it is necessary that we should be in a position to enforce our doctrine if need be. Hence our peace keeping navy.

If America can induce England and Germany—practically comprising the Anglo-Saxon race—to join her in an effort to keep the peace of the world, they will be able to command the attention of all nations, and if need be enforce their demand that all differences be settled by diplomacy or arbitration, and wars shall not be.

The world needs a leader and why may not America be that leader, leading in the best way?

Such is my wish and such is my faith. If you say, "The wish is father to the thought," I reply, "Very well." But such is my faith nevertheless. Is not this to indulge a laudable ambition for Uncle Sam? To do this we must learn to govern ourselves.

And here we face a difficult problem.

There is a bit of selfishness remaining even in Americans. We love to gratify our desires, passions and propensities.

In doing so we form habits.

Habits are not easily broken, even when we become convinced that they are pernicious.

We make spasmodic efforts, and then proceed to convince ourselves that after all they are not so bad and may be indulged. Then having concluded to indulge ourselves we are disposed to have little patience with others who would interfere or ask us to change. We say "This is my affair. You attend to your own business and I will attend to mine."

The "love of money" is said to be "the root of all evil." There are few things that men, at least some men, will not do for money. So when they see a pernicious habit has its grip upon a goodly number of the people, they say "I can make money by catering to that habit" and at once proceed to provide the means of indulgence, for a price, and a pretty good price at that.

Thus there grows up a business that makes money out of the weaknesses or vices of the unfortunate of the community.

Then if you touch that business you touch a sensitive nerve, to-wit, the pocket nerve.

Now this is not only true of individuals, but of communities, cities, states, and nations.

And why not? for these are simply aggregations of the individual. If every man would govern himself according to the principles of righteousness and benevolence, civil government would be a very simple matter.

But since some men will not do that, society must organize itself, to protect the innocent from the guilty, the good from the bad, the honest from the dishonest; it must prevent one part of the people from preying upon the others.

J. W. L.

In primitive times each man sought to protect himself.

Then there were conflicts.

Each man had his friends.

Cliques were formed with almost endless contentions, clashes and tribal wars.

Gradually society has become organized. Each man waives his right to protect himself, and society undertakes to protect him. Society enacts certain rules called laws for the information and guidance of all.

If each man would conscientiously obey the laws all would be well. But since some men will not obey the laws, society must take steps to enforce them. Here we have government. Government of cities, counties, states and the nation.

The lesser must be subordinate to the greater.

The town may not defy the county, the county may not defy the state and the state may not defy the nation. The national government must be supreme and must have means of enforcing its mandates. The National government in America we call Uncle Sam.

Uncle Sam has a large job on his hands. He has a numerous family to care for and keep in order. Perhaps none of his children really want to be disloyal; but there is more or less selfishness among them. They are a lively and energetic set, and something is doing most of the time.

Certain private or corporate interests are seeking to advance their moneyed interests and in so doing are prone to crowd the brother or the family. Energy, enterprise, industry and push are encouraged. But they must be under control.

It is better that people should control themselves than that they should be controlled by others.

But since some men will not control themselves righteously they must be controlled.

Here then is Uncle Sam's Job.

To control Himself.

To control his refractory children.

To elevate all his family, and to be a power in the world for the world's good.

J. W. LEWIS.

A QUEER SCIENCE

Mathematics is said to be an exact science. We wonder what kind of a system some of the politicians used before the election when they figured out such conflicting results? It must have been the science of "guess-at-ics." There was a time when a man voted for party, not a principal or the man behind it. Two men could work side by side for 364 days but on the 365th day "duty" made it imperative that their ways part. Both men may have voted for the yellow dog and it was simply a question of which one was the less vicious. Thank goodness! the good men who were so fortunate as to get into the State Legislature and have been working away so faithfully are succeeding in getting some laws enacted which directly affect the people and their power to direct the political situation, the principal of which being the new direct primary law. Later we will have a local option law, the initiative and referendum, and the recall. Then we can look for such a house-cleaning in this great state that will make its government as commendable as some of its other features.

ORDER TO SHOW CAUSE

IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA, IN AND FOR THE COUNTY OF SANTA CLARA.

In the Matter of the Estate of JOHN A. SILVEIRA, Deceased. No. 5449.

Annie M. Silveira, Administratrix of the estate of John A. Silveira, deceased, having filed herein her duly verified petition for an order of this Court authorizing and directing her to borrow the sum of \$700.00, or such lesser sum as the Court may deem necessary, wherewith to pay the debts and charges of the administration of said estate, and for the purpose of securing the payment of such loan to the lender of such money to mortgage all that certain real property of said estate situated in the County of Santa Clara, State of California, described as follows, to-wit:

Parcel No. 1. Beginning at a stake marked P. A. 1 standing at the Northeasternmost corner of land now or formerly of W. C. Abel in Pueblo Tract No. 1 as decreed to said Abel by the City of San Jose, by Deed of conveyance dated June 22, 1867, and being also the Westernmost corner of the 538 90-100 acre tract in said Pueblo Tract No. 1, decreed by said City of San Jose to J. M. and F. D. Ogan by Deed of conveyance dated April 12, 1873, and running thence along the fence on the Northwest line of said Abel's tract S. 62 degrees W. 20 67-100 chains to a redwood stake marked P. A. 2 along-side of which an iron bar 24 inches long and 1 1/2 inches x 1 1/2 inches is driven flush with the ground, and above which the fence is marked with a large letter "A"; thence along a tract of land now or formerly in possession of one Augustine Berryessa N. 31 1/2 degrees W. 20 37-100 chains to a redwood post marked P. A. 3 alongside of which an iron bar 24 inches long and 1 1/2 inches x 1 1/2 inches is driven flush with the ground; thence along the lands now or formerly of the heirs of Nicholas Berryessa N. 63 degrees 45 minutes E. 18 70-100 chains to a stake; thence parallel to the line of lands now or formerly in the possession of said Augustine Berryessa S. 31 1/2 degrees E. 20 22-100 chains to the place of beginning. Containing 42 36-100 acres, a little more or less, and being a portion of what is known as the Berryessa Tract of the Pueblo Lands of the City of San Jose, County of Santa Clara, No. 1. Courses true. Var. 17 degrees 10 minutes East.

Parcel No. 2. Beginning at a stake standing at the most Northern corner of a tract of land conveyed by J. A. Moultrie to Juan Antonio Silveira by deed dated November 21, 1888, and of record in the Recorder's office of said County in Book 72 of Deeds, page 545, and quitclaimed by said Moultrie to said Silveira by Deed containing corrected description dated July 20, 1888, running thence along the Southeastly line of land now or formerly owned by Manuela Berryessa N. 63 degrees 20 minutes E. 18 70-100 chains to a stake marked "B"; thence S. 31 degrees 45 minutes E. 18 70-100 chains to a stake marked "C"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "D"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "E"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "F"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "G"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "H"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "I"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "J"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "K"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "L"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "M"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "N"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "O"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "P"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "Q"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "R"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "S"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "T"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "U"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "V"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "W"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "X"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "Y"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "Z"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "A"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "B"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "C"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "D"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "E"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "F"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "G"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "H"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "I"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "J"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "K"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "L"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "M"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "N"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "O"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "P"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "Q"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "R"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "S"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "T"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "U"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "V"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "W"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "X"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "Y"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "Z"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "A"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "B"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "C"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "D"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "E"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "F"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "G"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "H"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "I"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "J"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "K"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "L"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "M"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "N"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "O"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "P"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "Q"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "R"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "S"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "T"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "U"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "V"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "W"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "X"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "Y"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "Z"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "A"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "B"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "C"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "D"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "E"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "F"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "G"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "H"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "I"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "J"; thence along the Northwestly line of said road S. 60 degrees 17 1/2 minutes E. 18 70-100 chains to a stake marked "K";
